Dear Responsible Person:

The No Action Alternative seems to be the best alternative in my humble opinion. In this time of the destruction of the environment by global warming, it seems like only common sense to preserve those forest which are preservable. Trees reduce the amount of carbon dioxide in the atmosphere.

As to the need to address financial matters, Congress should be prompted to appropriate additional funds from their federal timber receipts.

President Bush has indicated that he is concerned with global warming. Perhaps saving the beautiful forests of Oregon would be a wonderful place to begin an initiative to fight global warming.

Thank you for permitting me to offer my humble opinion.

Sincerely,

Caroline Getz
